Please delete claim 1-12 and 16-20 without prejudice. Applicant reserves the right to pursue the cancelled subject matter in a continuing application.

Claims 1-12 (Cancelled)

13. (Original) A method of accessing a valve assembly of a hydraulic assembly unit, said method comprising the steps of:

- (a) providing an enclosure assembly, said enclosure assembly including:
 - (i) a reservoir in fluid communication with the valve assembly;
 - (ii) a pivoting shelf upon which said valve assembly is coupled, said valve assembly having a front side, a rear side, and a top side;
 - (iii) a detachable cover;
- (b) removing said detachable cover; and
- (c) selectively accessing said front side, said rear side, and said top side of said valve assembly, without uncoupling said valve assembly from said pivoting shelf by pivoting said shelf and said valve assembly to a selected orientation.

14. (Original) The method of accessing a valve assembly according to claim 13, said method further comprising the steps of:

- (a) accessing said front side and said top side of said valve assembly from a first direction;
- (b) pivoting said shelf and valve assembly to a second orientation to expose said front side, said top side, and said rear side of said valve assembly for access from a second direction; and
- (c) pivoting said shelf and said valve assembly to a third orientation to expose said top side and said rear side of said valve assembly for access from a third direction.

15. (Original) The method of accessing a valve assembly according to claim 14, wherein pivoting said shelf and valve assembly from said first orientation to said third orientation angles said valve assembly approximately 90 degrees from an originating upright position.

Claims 16-20 (**Cancelled**)
